

NWP Healthy Film Society

June 2021 Movie: *Eating You Alive*

Eating You Alive addresses why 30.4 million people die each year and provides evidence based science, expert testimony and inspirational stories of disease reversal and a discovery that can cure our top killer diseases.

*Virtual discussion scheduled
for June 22, 2021, 6pm-7pm*

With the increase in health related documentaries, it's hard to know which to recommend to patients. The purpose of the Healthy Film Society is to come together and have a collective discussion about health related films and find ones appropriate to promote to our members.

Watch "Eating You Alive" for free on Tubi or Vudu or purchase from other streaming services and come ready to discuss on June 22.
